*The Sprite 12V is a Spectacular Laser Starfield, indoor or outdoor lighting effect for landscaping & architecture.*

*Only \$189cdn (power supplies extra)*

HollyNorth - Supplier of Special FX for the 2010 Olympic Ceremonies  
Canadian supplier of Blisslights, are pleased to introduce:

## *The Sprite - Green Laser*

Holiday lights without all the hard work? The ideal product to make Holiday decorating go fast and cost less in electricity. Set holiday lights in minutes rather than hours by simply positioning the BlissLight Spright and plugging it in.

- Easy to install stake mounted fixture
- Nighttime Operating temperature of -20°C to 32°C
- Uses an average of just 3 watts when temperatures are above 12°C and 8 watts if <12°C
- Automatically compensates for voltage drop in low voltage lighting systems
- (works with 9v to 24v AC and 12v to 32v DC)
- Microprocessor controlled for intelligent operation
- Generates and projects thousands of pin-points of light
- Weather resistant for outdoor use
- Transforms dark areas into a starfield array
- Features 2 built-in precision glass lenses
- Creates a one-of-a kind landscape lighting experience

Dimensions 4"W x 16"H x 6"L

Warranty 1 Year
